UP TO 1 IN 5 PEOPLE WITH CANCER WILL EXPERIENCE A CLOT\(^1\)

Signs to watch out for:

**A blood clot in your leg (DVT)**
- Tenderness in the leg
- Redness
- Swelling/tightness
- Pain in the leg
- Warmth and redness

**A blood clot in your lungs (or PE)**
- Shortness of breath
- Chest pain
- Coughing up blood
- Sweating
- Light-headedness or feeling faint

Clots are serious but effective treatments are available. If you experience any of these symptoms, contact your healthcare professional immediately.
